

ANA

beka DIFFERENT
BY DESIGN

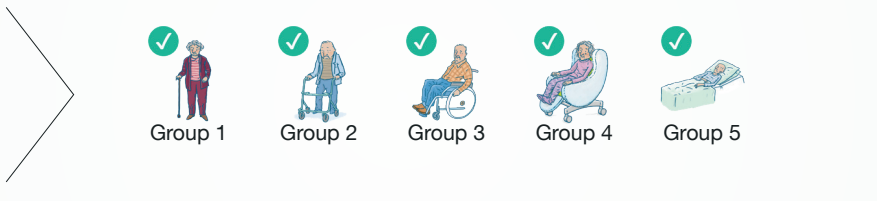

The ANA is freely accessible by all common bathing and person lifters as well as shower trolleys and wheelchairs.

The optional, foldable side rail offers additional security .

ANA is available with a foldable table, which makes it perfect for use in rooms with limited space.

All-purpose nursing table.

The universal wall mounted care table ANA allows optimum working height for the caregiver between 400 - 950 mm via the hand control. Due to the large lifting range, a direct transfer from a wheelchair is possible. The ANA offers a very comfortable and soft padding which is moisture-proof and can be easily disinfected.

The high quality construction and low profile of the ANA is an ideal solution for smaller rooms. The ANA is also available as a foldable version, which makes it even more space-saving when not in use.

✓ Different stretcher sizes and safety options available

The ANA is available in many different stretcher sizes to meet your individual requirements. Optionally, it can be equipped with foldable side rails for extra safety.

✓ Continuous height adjustment

Easily adjust the ANA electrically to an ergonomic working height via the hand control. The stretcher can move down to 400 mm, which can enable direct wheelchair transfers.

✓ Available with foldable stretcher

The foldable version of the ANA is very space-saving when not in use. It's perfect for rooms with limited space.
