Smart combination solution in a compact design.

The INVITA sitting and shower bath tub offers a unique concept for a combination of bathing and safe showering. The unsurpassed, ergonomic sitting position prevents the resident from sliding off while showering, and by swiveling the bath back, the resident has the opportunity to take a pleasant full bath.

The tub promotes independence and dignity of the resident through the possibility of self-entry into the tub. The side handles and horizontal foot area allow for safe entry. Patient lifts can also be used for transfer to the tub.

 Group 3

Large handles for secure self entry and exit

Compact design, the tub takes up little space

Hand control for simple tilt adjustment

Quick tub drainage

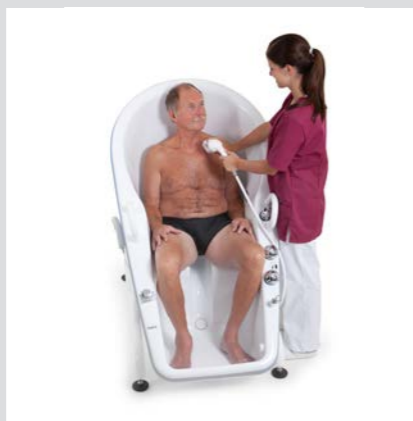

Optional: AirSpa system with circulation-promoting massage effect

Optional four castors for easy mobility

Safe sitting and lying position with a extra large hygiene opening

Generous upper body area with enough space when showering

The stepless, electrical tilt function brings the resident into a bathing position

Ideal for small room concepts

The compact shape of the INVITA offers the ability to bath and shower your residents, even in limited spaces.

Unique combination of showering and bathing

The secure seat offers ideal showering conditions for caregivers and residents. By tilting the tub the resident can enjoy a full bath.

Possibility of safe self-entry

The horizontal foot area with non-slip grooves and the large handles enable safe self-entry. The associated feeling of independence promotes the well-being of your residents immensely and offers a dignified approach to care.
